Overview and Background

1. Overview and Background

This report presents the results of a screening-level historic resources survey of the City of Ojai, and a description of the methodology used in conducting the survey. The purpose of the survey is to create a database for the City of Ojai for use in identifying the need for the preparation of Phase I Historic Resources Reports or Letter Reports in connection with the proposed alteration or demolition of potentially historic properties. This survey is a follow-up to a Reconnaissance Survey completed for the city in June 2009. A historic context statement was completed for the city in May 2009.

This Screening Survey resulted in the categorization of properties within the city as follows:

Category 1. Phase I Historic Resources Report Required.

Category 2. Phase I Historic Resources Report Not Required.

Category 3. Historic Resources Letter Report Required.

The findings of the survey are summarized in Section 4 of this report. The complete parcel-level results are found in the property data tables found in Appendix A of this report, and have also been provided to the city in digital form. These results update and supersede the findings of the Reconnaissance Survey. The digital photos taken for this survey have been provided on an optical disc with file numbers corresponding to the roll and frame numbers recorded in the tables.

Overview and Background

Database Construction

2. Database Construction

This survey utilized the property database originally constructed for the Reconnaissance Survey completed in 2009. This database consisted of 2,972 parcel records, including fields for parcel number, situs address, owner's name, parcel size, estimated date of construction, and a number of other data fields. A detailed characterization of the source data and its handling can be found in the *City of Ojai Historic Resources Reconnaissance Survey Final Report* (San Buenaventura Research Associates, 2009).

Prior to the initiation of the Screening Survey, a substantial proportion of the properties evaluated in the Reconnaissance Survey were automatically assigned to categories based on their evaluation scores in the survey:

- All properties rated VES=1 and Integrity=1 in the Reconnaissance Survey were automatically assigned to Category 1 (Phase I Historic Resources Report Required; 90 properties).
- All properties rated in the Reconnaissance Survey VES=3 and Integrity=3 were automatically assigned to Category 2 (Phase I Historic Resources Report Not Required; 143 properties).
- All properties which could not be evaluated in the Reconnaissance Survey because they could not be viewed from a public street were assigned to Category 3. (Historic Resources Letter Report Required; 111 properties).

The balance of properties were assigned tentatively to Category 3 (Historic Resources Letter Report Required; 378 properties). These include properties which received a VES=1 and Integrity=2 or 3; VES=2 and Integrity=1; VES=2 and Integrity=2 or 3 scores in the Reconnaissance Survey. The purpose of the Screening Survey was to reassign as many of these 378 properties as possible to Category 1 or Category 2, based on a closer examination of these properties in the field, comparison to each other within historic periods and themes, and limited property-specific research.

Database Construction

Survey Methodology

3. Survey Methodology

For all of the 378 properties referenced in Section 2, the following steps were undertaken:

Field Survey Methodology

1. The main building on the property was photographed, where feasible.
2. The architectural style of the building was recorded.
3. The alteration score previously recorded in the Reconnaissance Survey was updated, when appropriate.

Evaluation Methodology

1. A contextual theme or themes and historical period(s) from the Historic Context Statement were assigned.
2. Limited property-specific research was conducted. The majority of this research was based on Sanborn maps, with the purpose of verifying a date of construction or extent of alterations. These maps could only be utilized in the limited area where map coverage exists, mainly in and around the downtown area. Estimated dates of construction were revised, where the data suggested.
3. Due to their relative scarcity and relatively greater likelihood of historic associations, all properties constructed in or before 1917 with a VES=3 and Integrity=1 and not already included in Category 1 were assigned to Category 1, unless previously unknown integrity issues suggested a reevaluation of the Integrity score to a lower category. (7 properties)
4. Due to their relative commonness and relatively lower likelihood of historic associations, all properties built between 1918 and 1962 with a VES=3 and Integrity=1 were assigned to Category 2. An exception was made for properties for which some historic associations are already known. (555 properties)
5. For the remaining properties in Category 3, as many as possible were reassigned to Category 1 or Category 2, as defined in Section 2 of this report. Properties were grouped and compared by contextual periods and by contextual historic themes. The most representative examples of these periods and themes were considered to possess a higher likelihood of significance, and consequently were classified as Category 1. The less representative examples were considered to possess a lower likelihood of significance, so were classified as Category 2. In general, the reclassification to Category 1 was biased towards older, and consequently scarcer, properties. More recent and more common examples of period themes, and architectural styles were generally placed in Category 2. All tract homes, built mainly during the 1950s, were classified as Category 2 properties, as any significance they might have in the future would likely be as a grouping or district. A significant number of properties were retained in Category 3, due to an inability to view the property sufficiently to make a judgement, primarily due to vegetation interfering with a clear view of the buildings from the street.

Survey Methodology

Survey Results

4. Survey Results

Based on the methodology described in Section 3 of this report, 302 properties were placed in Category 1. All properties in this category are recommended to be subject to Phase I Historic Resources Reports prior to the issuance of permits for major alterations or demolitions to buildings on the property. Also based on the survey methodology 1,200 properties were assigned to Category 2. No further study of these properties is recommended.

The survey resulted in 161 properties remaining in Category 3. These properties should be subject to further review in a Letter Report prior to the issuance of permits for alteration or demolition of buildings on the property. The Letter Report will recommend the reassignment of the property into Category 1 or Category 2, the need for the completion of a Phase I Historic Resources Report, or determine that the proposed alterations will not have a potentially significant impact on a historic resource.

List Results

The complete list results are found in Appendix A of this report, and have been provided to the City of Ojai as a digital file. The tabular results presented in Appendix A of this report includes the following fields for each parcel in the survey:

Address	The Address column represents the situs address of the parcel as it is recorded by the Ventura County Assessor. The address is composed of four discrete database fields: Number, Direction, Street and Type. Note that the situs address is not necessarily the same as the parcel's street address, and also that many parcels within the city have no situs address or an incomplete situs address, missing all or some of the fields representing the complete address. For the most part, parcels missing some or all of the address fields appeared to be vacant parcels, but this could not always be verified in the field. Note also that numerous parcels in the County Assessor database included errors, particularly in the spellings of street names, directions and types. Corrections were made to the database with the assistance of Assessor Parcel maps or in field, to the greatest extent practical.
Other Address	Where the situs address recorded in the Assessors Record database is not the same as the street address for the buildings on the parcel, and where additional addresses could be verified in the field, they were added in this column.
APN	This field represents the full 9-digit Assessor Parcel Number recorded by the Ventura County Assessor.
Acres	Area of the parcel, in acres. This field was retained for the field survey to assist in the identification of small fractional or sliver parcels, most of which are vacant.
Historic Name	The historic name of a property was recorded in this field, when known, prior to the initiation of the Reconnaissance Survey field work.
Architect	The designer of a property was recorded in this field, when known, prior to the initiation of the Reconnaissance Survey field work.

Survey Results

AR Year	Year of construction recorded by the Ventura County Assessor. These dates tend to be more accurate for buildings constructed after 1945.
Field Year	<p>This column represents the Reconnaissance Survey field-verified year of construction. If the Ventura County Assessor date appeared to be correct, then this four-digit date was entered into the Field Year column. If no other documented date source was available or appeared to be correct, an estimated year of construction was recorded. Field estimated dates were always recorded in five year increments (all end with a '0' or '5'). Some of these dates were corrected or revised in the Screening Survey.</p> <p>Three other codes other than conventional dates were recorded in this field in the Reconnaissance Survey:</p> <p>0000 Parcels verified as vacant or used only as parking lots in the field survey. Many vacant parcels could not be readily verified in the field survey. No data was recorded for parcels not found in the field survey.</p> <p>1111 A building is known to exist on a parcel (e.g., partially visible, mailbox on street), but is not sufficiently visible for rating.</p> <p>9999 Parcels for which dates of construction were not visually verified. This includes streets with no Assessors Record dates of construction of 1963 or earlier. Most of these streets were not surveyed.</p>
Integrity	The integrity score of the parcel as determined in the Reconnaissance Survey. See the <i>Reconnaissance Survey Final Report</i> for more detail on this coding system. Note that some of these scores were revised in the Screening Survey.
VES	The Visual Evidence of Significance score as determined in the Reconnaissance Survey. See the <i>Reconnaissance Survey Final Report</i> for more detail on this coding system.
Style	<p>The predominant architectural style of the property as it was collected in the Screening Survey.</p> <p>FV Folk Victorian (1880-1900). These reduced versions of the Victorian styles adopted references to the plan and form of larger and more elaborate examples, but with the characteristic architectural details often reduced to token applications.</p> <p>VI Victorian Italianate (1870-1890). One of the earlier modes of the Victorian styles scarcely built in Southern California, these buildings refer to Italian rural architecture for their form and plan, but often draw from neoclassical designs for their details.</p> <p>CB California Bungalow (1905-1925). This architectural category covers the wide variety of bungalow forms from the Arts and Crafts Movement-inspired "Craftsman" mode displaying expressed structural elements and consciously naturalist forms, to the more vernacular interpretations found in homes designed and constructed by home builders, as well as the neocolonial variants found mainly after 1918.</p>

Survey Results

- MR Mission Revival (1895-1915). This relatively scarce style is directly related to the ecclesiastical colonial architecture of the Southwestern U.S., rather than Southern European models.
- SR Spanish Revival (1915-1950). This broad category includes the styles which rely more directly on historical sources drawn from the Mediterranean region of Spain, France and Italy. This style proved adaptable to all types of buildings, and by the 1920s become Southern California's dominant regional architectural style.
- CR Colonial Revival (1890-1925). Architectural episodes drawn on the buildings of the American colonial period have occurred repeatedly, often with very different results, but remain linked by their use of neoclassical forms and details.
- MY Monterey Revival (1920-1950). This variant of a 19th century Spanish-Mexican colonial building type was particular to the Pacific Southwest, and when revived was freely mixed with other period revival styles, making pure expressions of the style somewhat scarce.
- IV Industrial Vernacular (1890-present). This category covers the otherwise stylistically indistinct buildings constructed purely for utilitarian purposes.
- MT Minimal Traditional (1935-1950). This variant of the Ranch style incorporates often subtle neocolonial or period revival references, including Tudor, French Provincial, and Colonial, in terms of massing and details.
- R Ranch (1935-present). This classification covers a number of variants on the dominant domestic architectural style of the postwar era, which was derived generally from Spanish-Mexican Colonial rural vernacular forms, but developed into its own very widely distributed national postwar style with high-art, mass-produced, and vernacular expressions.
- HC Highway Commercial (1930-1960). The explosion of a national automotive culture, particularly during the postwar era, initiated its own architectural style derived from the demands and the aesthetics of the automobile.
- M Modern (1935-present). This category includes the wide variety of residential, institutional and commercial buildings that avoid historical references or traditional approaches. The majority of examples are found in the postwar era, and in California tend to follow the softer more naturalistic approach characterizing the Western version of the style. Earlier examples are more scarce, and often more closely related to the industrial imagery of European modernism.
- CV Commercial Vernacular (1890-1950). This classification covers buildings which generally follow the conventional three-part facade approach to commercial design prevalent before World War II, but are otherwise stylistically distinct or eclectic. The vast majority of these buildings were constructed prior to 1940, but the traditional approach to commercial design persisted to a diminished extent in the postwar era, even as it was being rapidly superseded by Modernism.
-

Survey Results

UK	Style could not be determined, either due to alterations which has caused to the property to be stylistically indeterminate, or because it was not sufficiently visible from a public street to determine a style.
Photo	The roll and frame number of the digital photos taken in the Screening Survey. A roll number corresponds to one day of field work in the survey.
Cat	The assigned review category created in the Screening Survey.

Recommendations

5. Recommendations

Historic Resources Review Procedures

The consultants recommend that the City of Ojai adopt review procedures which trigger the submission of the appropriate report by property owners proposing to substantially alter or demolish potentially historic properties.

Purpose and Contents of Phase I Historic Resources Reports

The purpose of a Phase I report is to determine if a property should be regarded as a historic resource for the purposes of the California Environmental Quality Act (CEQA). The report should contain:

- A historical narrative describing the known and potentially significant historical events, individuals or design features associated with the property, based on documentary evidence where available. Whenever possible, the significance of the property should be related to the themes and periods described in the Historic Context Statement, with expansion on these themes included where new evidence is discovered in property-specific research.
- A physical description of the buildings and structures on the property, with an emphasis on the character-defining features of the property, including architectural styles and/or methods of construction. Dates of construction and dates of significant alterations should be described, to the extent known, and based on documentary evidence where possible and on visual evidence where documentary evidence is not available.
- An evaluation of the significance of the property in accordance with the criteria of the National Register of Historic Places (NRHP), California Register of Historical Resources (CRHR) and the City of Ojai Landmarks ordinance. If the property is found to be significant under any of the listing criteria, a discussion of the property's integrity should be included, in accordance with aspects of integrity described in the NRHP and CRHR standards. The report should conclude whether the property's integrity is sufficient to convey its significance. At the end of this analysis, the report should provide a clearly-stated conclusion with respect to the property's eligibility, and whether it should be regarded as a historic resource for the purposes of CEQA.
- Photos of the property and immediate vicinity.
- A location map.
- A listing of primary sources utilized in the preparation of the report

Purpose and Content of Phase II Historic Resources Reports

A Phase II Historic Resources Report may be prepared when a property is determined to be a historic resource. The purpose of a Phase II Report is to determine whether the proposed project may have an adverse impact on historic resources. Language in the *CEQA Guidelines* states that if a project "will be conducted in a manner consistent with the *Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines*

Recommendations

for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings,” that the impacts are presumed to be fully mitigated. Other project approaches or alternatives may also mitigate adverse impacts partially or to a less than significant and adverse level. A Phase II Report should include:

- A complete description of the proposed project.
- A discussion of the project impacts, in terms of the criteria of eligibility, the aspects of integrity, and the *Secretary of the Interior’s Standards*.
- A determination of project impacts.
- Mitigation measures, alternatives, and a statement of residual impacts after mitigation.

Purpose and Contents of Letter Reports

The purpose of a Letter Report is to determine if a property should be reassigned to Category 1 or Category 2, or determine that the proposed alterations will not have a potentially significant impact on a historic resource. Prior to the completion of a Letter Report, the property owner should submit:

- A complete description of the proposed work, including materials to be used.
- Photographs of all buildings on the property. All elevations of main buildings should be photographed, and at least one photo of accessory buildings provided. If particular architectural elements (e.g., windows, doors, roofing materials) are to be altered or replaced, detailed photos of these elements should be included. Photos in digital form are preferable.
- A completed and signed Assessors Records release form. (See Appendix B)

The Letter Report should provide the following descriptive information and conclusions:

- A brief architectural description of the building(s) on the property, including architectural style.
- Date(s) of construction of building(s) on the property, if documented, or estimated dates based on visual evidence if not documented.
- The potential associations of the property, if any, with the themes and periods described in the Historic Context Statement.
- An assessment of the property’s integrity.
- One or more of the following recommended actions:
 - Reassignment of the property to Category 2 (Phase I Historic Resources not required).
 - Reassignment of the property to Category 1 and the preparation of a Phase I Historic Resources Report.
- Reassignment to Category 1 and the exemption of the proposed work from further review (No Phase I Historic Resource Report required at this time).

Recommendations

Recommended Permit Review Process

The data collected in this survey can be used to enhance the development permit review process by integrating it into the city's land use management system. This will enable the city to use the survey data as a screening device to determine the need to conduct further investigations into potential historic resources in connection with development proposals, thereby minimizing processing delays and decreasing the chance of permits being issued without the appropriate level of review. This data will also assist the city in complying with the requirements of the California Environmental Quality Act (CEQA) and Section 106 of the National Historic Preservation Act.

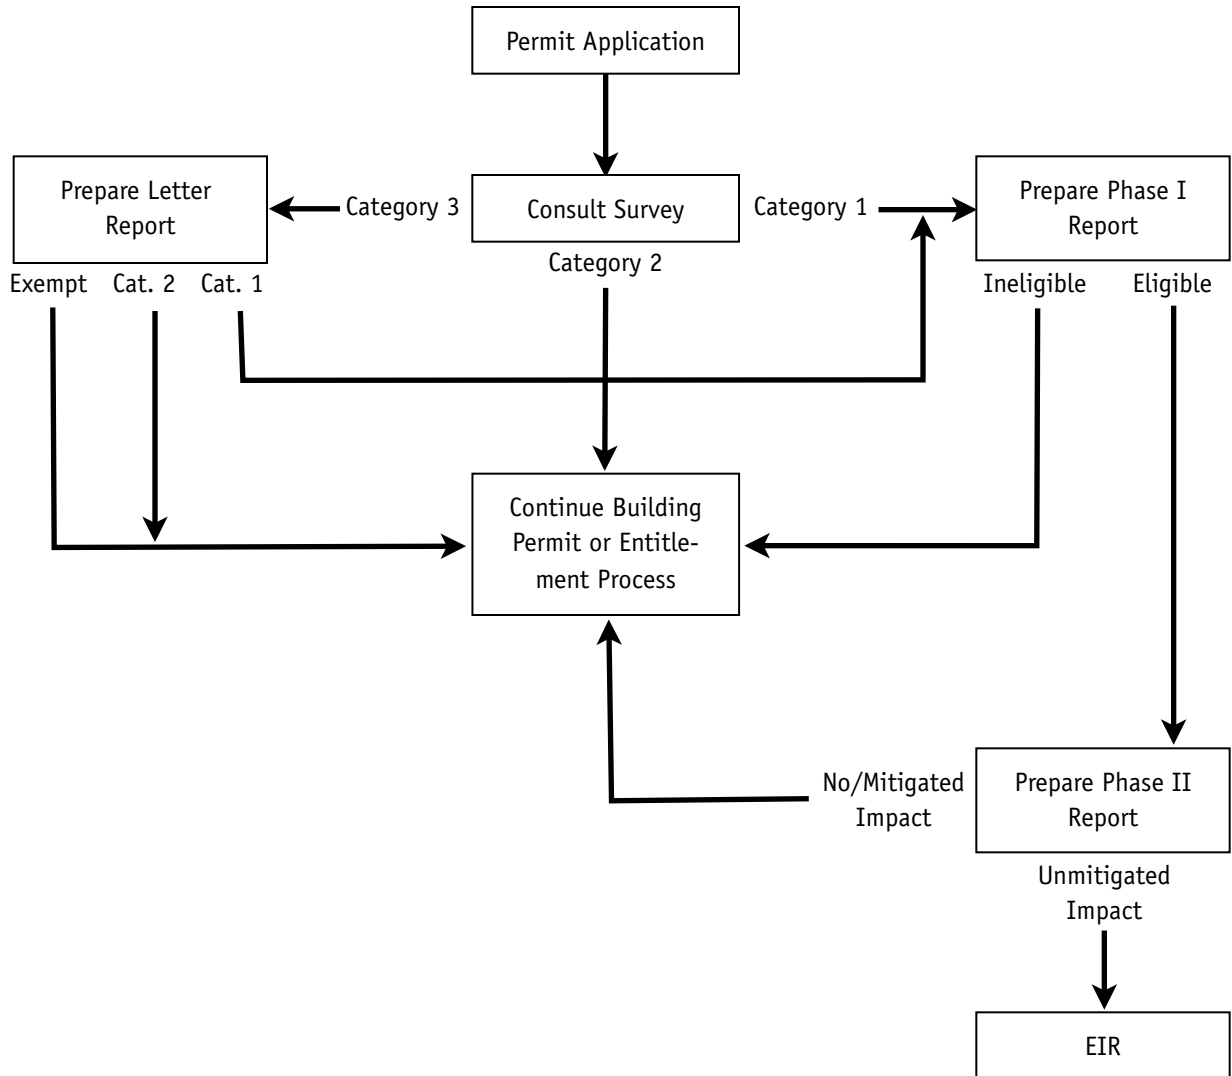

Procedural Review and Approach

The consultants recommend that city's building, planning and CEQA procedures be reviewed and amended as required to insure that historic resources issues are considered at appropriate points within these permitting and review processes. Issues recommended to be addressed include:

- Setting consistent thresholds for review (i.e., establishing types of permits which trigger review for potential historic resources impact issues).
- Clarifying or formalizing the role of the Historic Preservation Commission in the CEQA process.
- Establishing the City of Ojai as the client for all historic resources reports, rather than processing these requirements through individual property owners.
- Reviewing and revising the Ojai Landmarks Ordinance to segregate the listing criteria from other standards and listing considerations. The strength and clarity of the ordinance can be improved by breaking out integrity standards in a way more similar to the NRHP and CRHR, and by adding a minimum age threshold. A secondary level of designation might be added (e.g., Point of Interest), which recognizes the significance of altered properties.

The chart below outlines the recommended procedure for the review of permit applications for their potential to cause adverse impacts on historic resources, taking advantage of the categorization system created in this survey.
